## ARTHRITIS

Arthritis is a disease of the joints. It may be acute or chronic, and it may affect one joint or many joints. The most common form of arthritis is osteoarthritis, which is a degenerative disease of the joints. Other types of arthritis include rheumatoid arthritis, gout, and psoriatic arthritis. Arthritis can be caused by a variety of factors, including age, genetics, injury, and environmental factors. Treatment for arthritis may include medication, physical therapy, and surgery.

OFFICE OF THE GOVERNMENT STATIST,  
Melbourne, 1st February 1882.

SIR,

I have the honor to forward herewith the First Part of the completed returns of the Census of Victoria, 1881, "Inhabitants and Houses."

The Second and Third Parts are in the hands of the Government Printer, and further matter will be supplied without stoppage, so far as this department is concerned, until the whole is published.

The Census Parts will contain only the larger tables, which give the main results of the enumeration ; but I am at present engaged in preparing a Report upon the Census generally, to which will be appended a number of subsidiary tables containing averages, percentages, and comparative results, as well as a vast amount of other information of an interesting and instructive character, derived from the returns.

I have the honor to be,

Sir,

Your most obedient Servant,

HENRY HEYLYN HAYTER,

Government Statist.

The Honorable the Chief Secretary.
